Top Quality Marine & Fishing Accessories

V-12 Polymer Rod Rack

ASSEMBLY

1. Place bottom plate face up on a flat surface. (grooves up)
2. Place handle in groove on bottom, then place side supports in remaining grooves as in illustration.
3. Put top plate (grooves down) over handle and slide down on side supports and handle. Be sure all parts are in grooves.
4. Insert 4 - #6 x 1 screws through top plate and into side supports and handle in pre-drilled holes.
5. Carefully turn assembly over and insert remaining 4 screws through bottom plate.

This 100% marine-grade polymer rod rack is designed to hold all of your spinning, bait casting, and trolling rods and reels! Unlike conventional rod racks, the V-12 permits reels to be rotated for more compact storage. The small footprint uses minimal floor space and is easily moved inside or out with the built in carrying handle. The waterproof design is ideal for wash down of tackle after use. An attractive addition to any home or dock.

For additional rod racks and more top quality fishing and marine accessories ask your dealer or visit our web site at;
